

Professional Services

Consulting and Integration

PDS offers healthcare organizations unique transformational design and consulting services around cloud adoption, mobility, and data center automation.

Enterprise Architecture Planning

The PDS team of technologists and Principal Architects can lead your initiative with vision, principles, standards and a road map to help guide the prioritization, operations and management of technologies supporting your healthcare organization.

Data Center Virtualization and Automation

Data Center Virtualization and Automation is at the core of what PDS believes is essential for any healthcare organization to survive the next ten years – a software defined data center. If your organization hasn't begun to leverage and automate the data center, know your competition is.

Cisco Voice Planning and Design Services

PDS has partnered with Cisco to provide consulting services to successfully plan and design high-performance Cisco Unified Communications systems. A Cisco Unified Communication solution unifies voice, video, data, and mobile applications on fixed and mobile networks, delivering a media-rich collaboration experience across the organization and beyond.

Network and Identity Security Design

PDS delivers assessments, planning and design services to help mitigate security threats, identify network vulnerabilities, and recommend remediation steps.

Implementation Services

From deep in the data center to the remote clinical environment, PDS is ready to assist or manage end-to-end your most complex, advanced technology initiatives.

VMware Virtualization Services

As a VMware Enterprise Premier partner, PDS is the go-to partner in our region for delivering the most comprehensive VMware services available.

Data Center Technologies

PDS continues to maintain the highest certifications possible for servers, storage and networking credentials. These investments ensure our customers consistently receive the highest quality of service.

Identity & Access Management (IDM)

Identity and Access Management solutions from PDS provide the foundation for a secure, risk-aware environment. By managing identity and access across physical, virtual and cloud environments, this intelligent framework allows you to leverage your existing IT assets and new computing models like SaaS, while reducing cost and ensuring compliance.

OS Migrations

Are you prepared to transition your standard operating system without disrupting user productivity or breaking the IT bank? Our proprietary methodologies and process includes products and services that span the entire migration lifecycle and facilitates smooth, near-zero touch migrations.

Application and Desktop Virtualization

Give your care providers the flexibility and freedom to work from anywhere, from just about any device. Embrace consumerization and simplify IT with virtualized applications and desktops. PDS can help your team design, implement and manage a user experience that keeps up with the pace and expectations of today's care providers.

Messaging, Directory, and DT Management

PDS has over 15 years experience in desktop management services, including: Active Directory, eDirectory, Exchange, GroupWise, SCCM, ZENworks.

Collaboration Software Implementation

PDS offers Office 365 as a managed service, which includes Exchange, Lync and SharePoint workloads. Services includes onboarding (migration), training, support and development.

Network Infrastructure

Whether you need an architectural review or a complete upgrade to a 10GB network infrastructure, PDS can provide fast and efficient implementation services to accomplish your goals.

Cisco Voice and Collaboration

Our services ensure that your entire voice project is successful from initial design to tactical rollout. PDS

performs implementation services covering the entire planning, design, implementation, operation, and optimization of a Cisco Voice Solution.

Wireless Infrastructure Re-engineering

PDS can perform a complete wireless assessment and produce a detailed color coded floor plan of the entire facility that includes: heat map, signal coverage, access point locations, operational categories and their associated critical levels. PDS engineers devise a methodology and procedure for upgrading and expanding the system that includes priorities and risk analysis.

Mobile Device Management (MDM)

Enterprise management software today is not equipped to handle the device management challenges presented by non-Windows mobile devices. PDS can size and implement Mobile Device Management (MDM) software to secure, monitor, manage and support mobile devices deployed across mobile operators, service providers and enterprises. This applies to both physician-owned and patient-owned (BYOD) devices across the healthcare system.

Strategic Partnership

Our promise as a strategic partner: Provide solutions and services that enable healthcare organizations to improve care provider efficiency and enhance patient engagement, while reducing costs and enabling improved quality of care and healthcare outcomes.
